ISO 14001 is a series of important standards that encompass environmental management tools and systems. The decision to seek ISO 14001 certification is voluntary.

ISO 14001 was developed and is governed by the International Organization of Standardization – an association whose membership includes national standards bodies from more than 110 countries.

ISO 14001 – ANOTHER IMPORTANT LEADERSHIP INITIATIVE FROM LINCOLN ELECTRIC.

Lincoln Electric is very proud to be the first welding company to achieve ISO 14001 certification. But more important than our sense of accomplishment is our sense of responsibility. All of us at Lincoln take our commitment to ISO 14001 seriously.

Why did Lincoln Electric take such an aggressive approach to ISO 14001 certification? Because ISO 14001 helps us minimize waste, prevent pollution, and improve health and safety standards in our facilities.

ISO 14001 paves the way for us to be an even better corporate citizen. It's good for our company, good for our customers, good for our employees, and good for the communities where we work.

RELIABILITY

Lincoln's ISO 14001 certification translates to improved operating efficiencies, exceptional work force stability, and superior resource management. All of which means that the world's most respected manufacturer of welding equipment and consumables is now an even stronger, more reliable resource for companies that use welding.

VALUE

No question about it, ISO 14001 is another important element in the ever-expanding value story that Lincoln Electric has to tell. It's a story that starts and ends with quality people making the world's finest welding products; a story whose cast includes some of the world's best and brightest chemists, engineers and metallurgists. It's a story of smart management, and innovative, customer-first business.

And now with ISO 14001 certification, Lincoln's value story also includes the seamless integration of important environmental, economic and social policies into virtually every aspect of our operations.

Today, more than ever, the world's best welding partner is Lincoln Electric.

PEOPLE

Our ability to continue to deliver a steady stream of quality products to serve the needs of the world's welding consumers depends on our ability to retain a quality workforce.

The safety and health of our workers has always been a key focus at Lincoln Electric. ISO 14001 has sharpened that focus throughout our company.

ISO 14001 certification sends a clear signal — Lincoln Electric is a responsible employer, a responsible member of the communities in which we operate and a responsible global citizen.

**LEADERSHIP.
IT'S OUR HERITAGE.
IT'S OUR FUTURE.**
