INTRODUCTION

Make Your Mark in Welding
With a Hand from Lincoln Electric

Founded in 1895, Lincoln Electric has been a leader and innovator in the design and production of arc welding equipment and consumables since the beginning of the welding industry. Headquartered in Cleveland Ohio, we are also a worldwide leader in robotic arc welding systems as well as plasma and oxyfuel cutting equipment.

With over a century of leadership in welding education, our education team is committed to your career success.

- The Lincoln Electric Welding Technology & Training Center is a world-class training facility for welders and those who train welders, filled with the latest in booth and classroom equipment and practices.
- Our expert instructors are trained to instruct you on the science as well as the practice of welding, so that you understand why you perform a particular weld as well as how best to do it.
- Our Comprehensive program covers every major arc welding process and material type as well as oxyfuel and plasma cutting, preparing you to tackle a number of welding certifications.
- Our programs extend to seminars and workshops for the professional development of role in the welding community.
- Custom Training is available to any company’s production team to learn more about new technologies, equipment or master a weld for qualification.

Join the elite welders that pass through our training programs each year, prepared to face the challenges of the welding and fabrication industry.

Full Line of Equipment, Consumables and Accessories

Welding Products
Lincoln Electric is the world leading manufacturer of arc welding equipment, consumables and accessories for stick, TIG, MIG, flux cored and submerged arc welding, as well as oxyfuel and plasma cutting. We manufacture a full line of products for welding schools, light to heavy duty metal fabricators, maintenance shops, home use and more. Lincoln Electric’s product line includes:

» Welding equipment
» Welding consumables
» Personal Protection Equipment
» Accessory equipment and parts
» Cutting equipment
» Automation
» Fume Control Systems
» Gas apparatus by Harris Products Group®

Educational Discounts
Lincoln Electric offers an educational discounts to qualified schools on welding equipment and other products. The Lincoln Educational Discount is applied through sales to schools by our network of welding distributors. Contact your local Lincoln Electric Sales Office for more details.

In addition, qualified educators may purchase electrode, welding gear and tools at https://education.lincolnelectric.com/education-resource-purchasing-portal/.

Welding instructors and industrial trainers are also eligible for substantial savings on 1-2 week welding process classes.

Where to Get More Details
For complete details on all Lincoln Electric welding products, see our website at www.lincolnelectric.com and/or request a copy of our Product Catalog (E1.10). Or contact your local Lincoln Technical Sales Representative to discuss the most appropriate Lincoln Electric products for your particular school or other welding applications.

Arc Welding Safety – Materials and Products

At Lincoln Electric, we are committed to providing teachers and students with products, information and resources designed to ensure safety in the classroom and on the job site. These resources include:

» Welding helmets, welding safety glasses, welding gloves, welding clothing, welding gloves and other safety equipment
» Weld fume control solutions
» Welding safety video series
» Welding safety FAQs
» Arc welding safety posters, brochures, data sheets and DVDs

ANSI Z49.1 Safety Document
The American Welding Society offers a FREE download of the American National Standard Institute’s “Safety in Welding, Cutting, and Allied Processes” document (ANSI Z49.1:2012). This is the welding industry’s comprehensive reference on safety. This document is a must for every welding school, fabricator and home hobbyist. Get your free copy today at: www.aws.org/technical/facts.

Environmental Systems for Welding Schools
Some welding applications (welding school booths, welding in confined spaces, etc.) may warrant additional safety precautions from welding fumes, such as using weld fume control equipment. Lincoln Electric offers a full line of environmental systems for schools and welding shops. Product solutions vary from single or dual arm units to multi-arm centralized fume control systems. Some of the advantages of a system by Lincoln Electric are:

» Expert technical assistance available from one company on all your welding products – equipment, consumables and fume control systems
» Provide source capture using lightweight user-friendly arms
» Follow OSHA and AWS guidelines
» Offer working lamp and arc sensor technology options
» Reduce energy costs by indoor recirculation vs. exhausting to outside
» Variable speed fans increase or decrease based on demand
» Sound-absorbing boxes and in-line duct silencer lessen noise
» Custom central systems designed to your specific application

Overview of Welding School

School Offering
Lincoln Electric operates the longest running welding school in the world. Founded in 1917, the school has taught over 150,000 students from the United States and abroad. Our professional staff instructors bring a wealth of knowledge and experience to every classroom and lab experience.

Lincoln Electric’s Welding School offers a variety of classes, from a six week Basic SMAW course to an advanced twenty week Comprehensive Program, as well as one week classes on specific welding processes, certification or customized programs. Unless indicated otherwise, courses are held 8:00 a.m. - 2:30 p.m. daily, 5 days per week and 50 weeks per year. Students spend about 20% of their time in the classroom and 80% in the booth learning to weld. The instructor to student ratio is kept low to provide plenty of individual guidance. A large supply of steel plate is provided so students spend all their time learning to weld, not cutting and preparing practice coupons.

Benefits of Attending
» Learn welding from a proven industry leader and operator of the longest continually operating welding training program in the world.
» Train at a major hub for welding research and development at Lincoln Electric’s global headquarters campus.
» Access career fairs and thousands of potential welding jobs through Lincoln Electric’s career board.
» Practice on the most advanced welding equipment and the best consumables in the industry.
» Work with highly trained and qualified instructors who are committed to your success.
» Learn and practice in a safety working environment. Receive a Lincoln Electric Welding School graduation certificate upon successful graduation of the course. Combine your new welding skills with Lincoln Electric’s reputation for producing quality students to improve your chances of landing a great welding job.

**Online Course Registration**

**Registration Information**
Register online for all Lincoln Electric training courses, including Professional Seminars, Distributor Training Programs, Service School Courses, Robotic Training Courses, and Welding School Courses.

**How To Register**
Register for all courses with a few simple steps:
Go to the Lincoln Electric website at www.lincolnelectric.com.

1. Click **EDUCATION** from the home page and select **WELDING SCHOOL**
2. Select **REGISTER FOR CLASSES**
3. Select **FIND A COURSE**
4. Select **COURSE CATALOG**

**Registration and Payment Questions?**
Contact the Lincoln Electric Weld Team

METAL101 - Weekend With Metal

Course Description
14 Clock Hours, Two Days
Join welders of all skill levels in a safe, relaxed atmosphere and take advantage of an affordable opportunity to learn the basics of welding. Instruction covers Safety, Shielded Metal Arc Welding (Stick) and Gas Metal Arc Welding (MIG).

Requirements:
No experience necessary. All Personal Protective Equipment (including safety glasses, welding jacket, gloves and helmet) will be provided by Lincoln Electric for use during the class. Participants must wear their own steel-toed boots, long sleeved cotton shirts and long pants (no shorts or capris permitted). Participants must be 18 years old or older.

Code: METAL101
Duration: Two Days (Sat/Sun)
Time: 8:00 a.m. – 3:00 p.m.
Course Fee: $199.00

Course Dates:
METAL101_19_02 10/12/2019 – 10/13/2019
WIWW201 - Women in Welding Weekend

Course Description
14 Clock Hours, Two Days
A two-day introduction to welding created just for women. Join other women in learning, creating and welding with a female welding instructor. The first day of class begins with a discussion of safety and proper attire in welding (all gear provided). Later, we’ll learn about the history and process of Shielded Metal Arc Welding (stick) to prepare to weld. Practice on a virtual reality welder before heading out to the lab for some hands-on experience. The following day, we’ll roll into the Gas Metal Arc Welding (MIG) process and more practice in the morning. During the afternoon, all participants will receive Torchmate™ plasma cut pieces and one-on-one instruction to assemble a welded rose sculpture.

Requirements:
No experience necessary. All Personal Protective Equipment (including safety glasses, welding jacket, gloves and helmet) will be provided by Lincoln Electric for use during the class. Participants must wear their own steel-toed boots, long sleeved cotton shirts and long pants (no shorts or capris permitted). Participants must be 18 years old or older. Welding done on bevel plates with E7018; stringers vs. weave.

Code: WIWW201
Duration: Two Days (Sat/Sun)
Time: 8:00 a.m. – 3:00 p.m.
Course Fee: $199.00

Course Dates:
WIWW201_19_01 3/30/2019 - 3/31/2019
INTRO101 - Introduction to Welding

Course Description
30 Clock Hours: Lab - 25, Class - 5, One Week
Designed to instruct welders in welding safety and welding techniques utilizing various processes like Shielded Metal Arc Welding (SMAW), Gas Metal Arc Welding (GMAW), Gas Tungsten Arc Welding (GTAW), and plasma cutting.

Course Content
Day 1
Introduction to welding safety and the Fill Freeze and Fast Fill groups of electrodes. One half of the stick lecture will be today. Weld with 6013 flat and horizontal sheet metal. Weld with 7024-1 flat and horizontal 3/8 inch to 1/2 inch plate, single pass and three pass.

Day 2
Second half of stick lecture. Cover Fast Freeze (6010 and 6011), and low hydrogen groups of electrodes. Weld flat and vertical up with both groups of electrodes.

Day 3
Basic MIG lecture. Weld short arc, globular, spray, and pulse spray.

Day 4
Basic TIG lecture. Weld on steel and stainless steel.

Day 5
Plasma cutting.

Personal Protection Equipment (PPE) and Tools Required for Class:
(Welding Gear can be purchased on site. Student must supply his/her own steel-toe, safety shoes and tools.)

- Ankle High, Steel-Toe, Safety Shoes
- Safety Glasses w/ Side Shields
- Welding Jacket
- Welding Gloves
- Welding Cap
- Welding Helmet
- Welper® Pliers
- Channellock® or Vise-Grip®
- Wire Brush
- Chipping Hammer

Code: INTRO101
Duration: Five Days
Time: 8:00 a.m. - 2:30 p.m.
Course Fee: $661.25
Registration Fee: $50.00
Course Dates:
INTRO101_19_01   1/14/2019 - 1/18/2019
INTRO101_19_03   12/9/2019 - 12/13/2019
SMAW 101 - Introduction to Basic Plate & Sheet Metal Arc Welding

Course Description
30 Clock Hours, One Week
Designed to instruct welders in welding safety with an overview of basic weld symbols, SMAW electrode types and selection, classification of electrodes, power sources and polarity. There will be discussions on advantages and limitations of electrodes as well as different welding techniques. Welding will take place on various mild steel thicknesses in all positions.

SMAW 201 - Basic Plate & Sheet Metal Welding

Course Description
180 Clock Hours, Six Weeks
Designed to instruct welders in arc welding safety and the Shielded Metal Arc Welding process (SMAW - Stick). The course lasts 6 weeks, involving approximately 180 hours of booth instruction, lecture and practice.

Course Content
Week 1
Introduction to welding safety and electrodes: types, selection, classification and qualification.

Week 2
Discussion of power source: types, selection and duty cycle as well as cable sizing, arc blow and welding symbols.

Week 2 Welding Test

Week 3
Discussion of electrodes: advantages, limitations, and vertical-up vs. vertical down in addition to certification and qualification test training.

Week 4
Discussion of non-destructive testing, fillet gauge use and weld size determination as well as a review of low hydrogen electrode procedures and techniques.

Week 5
Practicing all of the manipulative arc welding techniques learned during the prior four weeks.

Week 5 Welding Test. Final Exam and Evaluation

Week 6
Introduction to oxyfuel safety and oxyfuel processes: cutting and welding. Welding done on bevel plates with E7018; stringers vs. weave.

Code: SMAW101
Duration: Five Days
Time: 8:00 a.m. - 2:30 p.m.
Course Fee: $632.50
Registration Fee: $50.00
Course Dates:
- SMAW101_19_02 6/3/2019 - 6/7/2019
- SMAW101_19_03 9/9/2019 - 9/13/2019
- SMAW101_19_05 11/18/2019 - 11/22/2019
- SMAW101_19_06 12/2/2019 - 12/6/2019
- SMAW101_19_07 12/9/2019 - 12/13/2019
- SMAW101_19_08 12/16/2019 - 12/20/2019

Code: SMAW201
Duration: Six weeks
Time: 8:00 a.m. - 2:30 p.m.
Course Fee: $2162.50
Registration Fee: $37.50
Course Dates:
SMAW201_19_01 2/4/2019 - 3/15/2019
SMAW201_19_02 9/30/2019 - 11/8/2019

Personal Protection Equipment (PPE) and Tools Required for Class:
(Welding Gear can be purchased on site. Student must supply his/her own steel-toe, safety shoes and tools.)
- Ankle High, Steel-Toe Safety Shoes
- Safety Glasses w/ Side Shields
- Welding Jacket
- Welding Gloves
- Welding Cap
- Welding Helmet
- Welper® Pliers
- Channellock® or Vise-Grip®
- Wire Brush
- Chipping Hammer
GTAW101 - Gas Tungsten Arc Welding

Course Description
30 Clock Hours, One Week
Designed to instruct welders in welding safety and the Gas Tungsten Arc Welding process (GTAW - TIG). The course lasts 1 week, involving approximately 30 hours of booth instruction, lecture and practice.

Course Content
» Learn fundamentals of GTAW (TIG) for steel, stainless steel and aluminum.
» Welding procedures are taught on aluminum, carbon and stainless steels.
» Welding consists of edge, corner, lap and fillet welds in all positions.
» Welding is limited to regular thin flat material, which does not include thick plate, pipe or other irregular shapes.

Personal Protection Equipment (PPE) and Tools Required for Class:
(Welding Gear can be purchased on site. Student must supply his/her own steel-toe, safety shoes and tools.)
- Ankle High, Steel-Toe, Safety Shoes
- Safety Glasses w/ Side Shields
- Welding Jacket
- Welding Gloves
- Welding Cap
- Welding Helmet
- Welper® Pliers
- Channellock® or Vise-Grip®
- Wire Brush
- Chipping Hammer

Please Note: If a student desires to practice on different types of welds, and/or materials other than those offered, material must be provided by student.

Code: GTAW101
Duration: Five Days
Time: 8:00 a.m. - 2:30 p.m.
Course Fee: $690.00
Registration Fee: $50.00

Course Dates:
GTAW101_19_01   1/7/2019 - 1/11/2019
GTAW101_19_02   1/28/2019 - 2/1/2019
GTAW101_19_03   2/25/2019 - 3/1/2019
GTAW101_19_05   4/8/2019 - 4/12/2019
GTAW101_19_07   7/29/2019 - 8/2/2019
GTAW101_19_08   10/7/2019 - 10/11/2019
GTAW101_19_09   10/28/2019 - 11/1/2019
GTAW101_19_10   11/18/2019 - 11/22/2019
GTAW101_19_11   12/16/2019 - 12/20/2019
GMAW101 - Gas Metal Arc Welding – Semiautomatic

Course Description
30 Clock Hours, One Week
Designed to instruct welders in welding safety and the Gas Metal Arc Welding process (GMAW - MIG). The course lasts 1 week, involving approximately 30 hours of booth instruction, lecture and practice.

Course Content
» Learn fundamentals of GMAW [MIG].
» Instruction on the metal arc transfers of short circuiting, globular, spray arc, pulsed spray arc, Power Mode and Surface Tension Transfer®.
» Learn how various shielding gases affect gas metal arc welding.
» Individual booth time will be dedicated to welding on mild steel, stainless steel and aluminum in all welding positions.

Personal Protection Equipment (PPE) and Tools Required for Class:
(Welding Gear can be purchased on site. Student must supply his/her own steel-toe, safety shoes and tools.)
- Ankle High, Steel-Toe, Safety Shoes
- Safety Glasses w/ Side Shields
- Welding Jacket
- Welding Gloves
- Welding Cap
- Welding Helmet
- Welper® Pliers
- Channellock® or Vise-Grip®
- Wire Brush
- Chipping Hammer

Code: GMAW101
Duration: Five Days
Time: 8:00 a.m. - 2:30 p.m.
Course Fee: $632.50
Registration Fee: $50.00

Course Dates:
GMAW101_19_01   1/21/2019 - 1/25/2019
GMAW101_19_03   2/25/2019 - 3/1/2019
GMAW101_19_07   5/6/2019 - 5/10/2019
GMAW101_19_09   12/16/2019 - 12/20/2019

Please Note: If a student desires to practice on different types of welds, and/or materials other than those offered, material must be provided by student.
FCAW101 - Flux-Cored Arc Welding

Course Description
30 Clock Hours, One Week
Designed to instruct welders in welding safety and the Flux-Cored Arc Welding process (FCAW) for both self-shielded (Innershield®) and gas-shielded (Outershield® and UltraCore®) methods.

Course Content
» Learn fundamentals of FCAW Self-Shielded (Innershield®).
» Learn fundamentals of FCAW Gas-Shielded (Outershield®).
» Weld on 10 gauge through 1 inch thick material in all positions.
» Use a variety of electrodes, wire feeders and power sources.
» Typical joint designs used in construction and shipbuilding are welded, which consist of fillet, lap, groove and butt welds.
» Final weld tests are on 1 inch bevel plate vertical up with and without a backin bar.

Personal Protection Equipment (PPE) and Tools Required for Class:
(Welding Gear can be purchased on site. Student must supply his/her own steel-toe, safety shoes and tools.)

- Ankle High, Steel-Toe, Safety Shoes
- Safety Glasses w/ Side Shields
- Welding Jacket
- Welding Gloves
- Welding Cap
- Welding Helmet
- Welper® Pliers
- Channellock® or Vise-Grip®
- Wire Brush
- Chipping Hammer

Code: FCAW101
Duration: Five Days
Time: 8:00 a.m. - 2:30 p.m.
Course Fee: $632.50
Registration Fee: $50.00

Course Dates:
FCAW101_19_01  4/22/2019 - 4/26/2019
FCAW101_19_02  6/10/2019 - 6/14/2019
FCAW101_19_03  12/2/2019 - 12/6/2019

Please Note: If a student desires to practice on different types of welds, and/or materials other than those offered, material must be provided by student.
SAW201 - AC/DC Submerged Arc Welding (SAW) Training

Course Description
18 Clock Hours - Three Days
Designed to instruct welding personnel in arc welding safety and the submerged arc welding process (SAW).

Course Content
» Arc welding safety for SAW process.
» Review fundamentals of SAW.
» Weld with single and tandem wire equipment systems.
» Wire and flux applications, polarity and troubleshooting of weld defects are discussed.
» Power Wave® AC/DC 1000® systems will be used, including the MAXsa™ 10 controller and Cruiser® tractor.
» Experience firsthand how Power Wave® waveform technology can help you gain significant increases in productivity and quality over conventional SAW technology.

Personal Protection Equipment (PPE) and Tools Required for Class:
(Welding Gear can be purchased on site. Student must supply his/her own steel-toe, safety shoes and tools.)
- Ankle High, Steel-Toe, Safety Shoes
- Safety Glasses w/ Side Shields
- Welding Jacket
- Welding Gloves
- Welding Cap
- Welding Helmet
- Welper® Pliers
- Channellock® or Vise-Grip®
- Wire Brush
- Chipping Hammer

Code: SAW201
Duration: Three Days
Time: 8:00 a.m.- 2:30 p.m.
Course Fee: $650.00
Registration Fee: $50.00

Course Dates:
SAW201_19_02 11/19/2019-11/21/2019

Please Note: If a student desires to practice on different types of welds, and/or materials other than those offered, material must be provided by student.
TORCH101 - Torchmate® CNC Plasma Cutting Fundamentals

Course Description
40 Clock Hours, One Week
The training provided will cover Torchmate® CAD software and the operations of the Torchmate® machine with the Lincoln Electric FlexCut® plasma power supply. This training is a hands-on, project-based course to get you from installation of your machine to your first metal cut project. Learn from the Lincoln Electric Cutting Experts on how to run your Torchmate® 4800 machine with confidence.

Requirements:
Ankle-high leather safety steel-toed shoes are mandatory for this class. Student provides personal tools, including Channellock® and flashlight.

Code: TORCH101
Duration: Five Days
Time: 8:00 a.m.- 4:00 p.m.
Course Fee: $700.00
Registration Fee: $50.00

Course Dates:
TORCH101_19_02 6/10/2019 – 6/14/2019
AUTO101 - Automation 101 Seminar

Course Description
40 Clock Hours, One Week
This seminar is designed for an individual or company to see what it takes to successfully implement automation into their facility. Topics will include safety, tooling, ROI calculations, environmental considerations, partnerships and more.

Gain the tools necessary to properly evaluate the how and why a company should automate and gain an understanding of how Lincoln Electric can help you do it!

Requirements:
Ankle-high leather safety steel-toed shoes are mandatory for this class. Pancake-style hoods or helmets are not permitted in the welding school. Student provides personal tools, including Channellock® and flashlight.

Code: AUTO101
Duration: Five Days
Time: 8:00 a.m. – 4:00 p.m.
Course Fee: $500.00
Registration Fee: None

Course Dates:
AUTO101_19_01 6/17/2019 - 6/21/2019
AUTO101_19_02 9/30/2019 - 10/4/2019
Comprehensive Program

Course Description
600 Clock Hours, 20 Weeks
Designed to instruct welders in arc welding safety and all of the common welding processes. The course lasts 20 weeks and involves more than 600 hours of hands-on instruction. Personal Protection Equipment (PPE) gear pack is included and provided on the first day of class.

Course Content
» Comprehensive Shielded Metal Arc Welding (6 weeks)
» Comprehensive Pipe (API or ASME) (6 weeks)
» Comprehensive Plasma, Oxyfuel, Alloy and Hardfacing (2 weeks)
» Comprehensive Gas Tungsten Arc Welding (2 weeks)
» Comprehensive Basic Gas Metal Arc Welding (2 weeks)
» Comprehensive Basic Flux-Cored Arc Welding (2 weeks)

Duration: Twenty Weeks
Course Fee: $9,425.00
Time: 8:00 a.m. – 2:30 p.m.
Registration Fee: $125.00
Course Dates:
1/7/2019 - 5/24/2019
1/21/2019 - 6/7/2019
4/1/2019 - 8/23/2019
5/13/2019 - 10/4/2019
6/10/2019 - 11/1/2019
7/8/2019 - 11/22/2019
7/29/2019 - 12/20/2019
9/16/2019 - 1/24/2020

Please Note: If a student desires to practice on different types of welds, and/or materials other than those offered, material must be provided by student.
MTRS301 - Motorsports – Basic Materials Program

What Is It?
36 Clock Hours, One Week
Five day technical program limited to 18 attendees that is approximately 30% classroom and 70% hands-on.

The primary focus of this course is on basic motorsports materials and applications [GMAW, GTAW, Oxyfuel, and Plasma Cutting] including aluminum and stainless steel. In addition to these concepts, new technologies will be introduced, which include Waveform Control Technology® and Precision TIG® technology.

Purpose
To enhance your knowledge of current thinking in arc welding safety, processes, instruction, concepts, equipment and consumables, as well as your welding skills.

Course Content
» Day 1 - Safety and Gas Tungsten Arc Welding (TIG)
» Day 2 - Gas Metal Arc Welding (MIG)
» Day 3 - Alloy (Metallurgy, Identification, Classification, Preheating)
» Day 4 - Alloy [Aluminum and Stainless Steel]
» Day 5 - Oxyfuel, Plasma Cutting, Open Lab and Plant Tour, and TIG Kit with Gas Lens Parts.

Personal Protection Equipment (PPE) and Tools Required for Class:
(Welding Gear can be purchased on site. Student must supply his/her own steel-toe, safety shoes and tools.)

- Ankle High, Steel-Toe, Safety Shoes
- Safety Glasses w/ Side Shields
- Welding Jacket
- Welding Gloves
- Welding Cap
- Welding Helmet
- Welder® Pliers
- Channellock® or Vise-Grip®
- Wire Brush
- Chipping Hammer

Please Note: If a student desires to practice on different types of welds, and/or materials other than those offered, material must be provided by student.
MTRS302 - Motorsports – Advanced Materials Program

It is highly recommended that students attend the Motorsports Basic Materials Program course (MTRS301) prior to enrolling in this course.

What Is It?
36 Clock Hours, One Week

Five day technical program limited to 18 attendees that is approximately 30% classroom and 70% hands-on.

The primary focus is on advanced motorsports materials and applications utilizing the Gas Tungsten Arc Welding (GTAW) process including materials like chrome-moly, inconel, magnesium and titanium. In addition to these concepts, new technologies will be introduced, which include Waveform Control Technology® and Precision TIG® technology.

Purpose
To enhance your knowledge of current thinking in arc welding safety, processes, instruction, concepts, equipment and consumables as well as your welding skills.

Course Content
» Day 1 - Safety, GTAW (TIG) Chrome-moly
» Day 2 - GTAW (TIG) Titanium
» Day 3 - GTAW (TIG) Inconel
» Day 4 - GTAW (TIG) Magnesium
» Day 5 - New Products, Open Lab and Plant Tour

Personal Protection Equipment (PPE) and Tools Required for Class:
(Welding Gear can be purchased on site. Student must supply his/her own steel-toe, safety shoes and tools.)

- Ankle High, Steel-Toe, Safety Shoes
- Safety Glasses w/ Side Shields
- Welding Jacket
- Welding Gloves
- Welding Cap
- Welding Helmet
- Welper® Pliers
- Channellock® or Vise-Grip®
- Wire Brush
- Chipping Hammer

Code: MTRS302
Duration: Five Days
Time: 8:00 a.m. - 4:00 p.m.
Course Fee: $1,150.00
Registration Fee: $125.00

Course Dates:
MTRS302_19_01  2/18/2019 - 2/22/2019
MTRS302_19_03  4/1/2019 - 4/5/2019
MTRS302_19_04  8/12/2019 - 8/16/2019
MTRS302_19_05  9/16/2019 - 9/20/2019
MTRS302_19_06  12/9/2019 - 12/13/2019

Please Note: If a student desires to practice on different types of welds, and/or materials other than those offered, material must be provided by student.
ALUM301 - Aluminum Solutions:  
Practical Training for Welding Aluminum Alloys

Course Description  
22 Clock Hours, 3.5 days
Aluminum has become increasingly prevalent in a number of manufacturing industries because it delivers an improved strength to weight ratio over steel and is corrosion resistant. Yet, welding aluminum can be difficult compared to other materials. Learn about the latest welding technology with hands-on practical application demonstrations and lectures for Practical Training in Welding Aluminum Alloys.

Topics will include:
» Improve your GMAW and GTAW aluminum welding skills through extensive practical application
» Overview of various welding process modes: CV, Power Mode, Pulse and AC Pulse
» Learn how to properly set up weld tests for various parameters and positions
» Tour Lincoln Electric’s state-of-the-art manufacturing facilities, R&D Tech Center and Automation Division
» Qualification Test Training for AWS D1.2 Standard
» A Lincoln Electric Certificate of Completion will be issued on successful completion of the training

Code: ALUM301  
Duration: 3.5 Days  
Time: 8:00 a.m. - 2:30 p.m.  
Course Fee: $569.25  
Registration Fee: None  
Course Dates:  
ALUM301_19_02 10/8/2019-10/11/2019

Personal Protection Equipment (PPE) and Tools Required for Class:  
(Welding Gear can be purchased on site. Student must supply his/her own steel-toe, safety shoes and tools.)

- Ankle High, Steel-Toe, Safety Shoes
- Safety Glasses w/Side Shields
- Welding Jacket
- Welding Gloves
- Welding Cap
- Welding Helmet
- Welper® Pliers
- Channellock® or Vise-Grip®
- Wire Brush
CWI401 - CWI Prep Course, Seminar and Exam

Lincoln Electric CWI Prep Course
30 Clock Hours, One Week
This is a course taught by the Lincoln Electric Welding School to give you an extra week of low cost preparation for the American Welding Society’s (AWS) Certified Welding Inspector (CWI) Seminar and Exam. Included in the program are demonstrations and discussions of the various welding processes, including but not limited to metallurgy, discontinuities, preheat, welding symbols, etc. It is offered the week before the AWS CWI Seminar.

Student is responsible for providing their own code book.

AWS CWI Seminar and Exam
Lincoln Electric is a host site for the American Welding Society’s (AWS) Certified Welding Inspector (CWI) seminar and examination. In the seminar you will be taught by an AWS instructor how to reference AWS code, examine welds and prepare for the CWI exam on that following Saturday (proctored by AWS).

Seminar starts at 1:00 p.m. on Sunday. Please register for the seminar and exam through AWS.

Note: You must register 8 weeks prior to CWI exam date in order to reserve your spot.

Requirements
Contact Lincoln Electric Welding School and download CWI packet from http://www.aws.org/certification/CWI or call AWS at 800-443-9353 ext. 273 to register for exam.

Note: 5 year detailed work history must be completed before testing. Not a Résumé.
Qualification and Certification Training

**Qualification Test Training**

**Shielded Metal Arc Welding**
Additional training is available to graduates of the Lincoln Basic Plate and Sheet Metal Welding who wish to take an operator qualification test for AWS structural code work, and to graduates of the Lincoln Pipe Welding Course who wish to take similar tests for ASME (vertical-up) or API (vertical down) code work. Welders with equivalent experience may also qualify for this training.

**Flux-Cored Arc Welding Self-Shielded/Gas-Shielded**
Classes are available to companies and/or individuals who want to practice welding techniques for passing an operator qualification test or procedure qualification test. This course is also designed to give the proper application skills to an instructor for in-plant training of FCAW-S (Innershield) and/or FCAW-G (UltraCore).

**Qualification Test Training**
- AWS Test Semiautomatic Flux-Cored Arc Welding Self-Shielded
- 3/8 in. AWS Fillet Test Shielded Metal Arc Welding
- AWS Test Shielded Metal Arc Welding
- ASME Test Shielded Metal Arc Welding
- ASME/API Pipe Welding
- Low Hydrogen Pipe
- API Butt/Branch/Sleeve

**Please Note for Qualification Courses**
- One week is usually sufficient for anyone with welding experience in the process being tested.
- Customers must furnish plate of the type to be used in practicing for the qualification tests.
- The cost of testing ranges from $150.00 to $300.00 for AWS, ASME or API codes and is paid directly to an independent testing laboratory where the test sample is taken. Actual test costs vary throughout the country depending upon the facility.

**Training/Certification**
The Lincoln Electric Welding School can meet your needs for customized training and/or certification at Lincoln Electric Corporate in Cleveland, Ohio or at your particular location.

**Please Note: Actual testing done by an independent testing facility.**

---

**Personal Protection Equipment (PPE) and Tools Required for Class:**
(Welding Gear can be purchased on site. Student must supply his/her own steel-toe, safety shoes and tools.)

- Ankle High, Steel-Toe, Safety Shoes
- Safety Glasses w/ Side Shields
- Welding Jacket
- Welding Gloves
- Welding Cap
- Welding Helmet
- Welper® Pliers
- Channellock® or Vise-Grip®
- Wire Brush
- Chipping Hammer

**AWS Test Semiautomatic FCAW**
Course Fee: $550.00
Registration Fee: $50.00

**3/8” AWS Fillet Test-SMAW (stick)**
Course Fee: $550.00
Registration Fee: $50.00

**AWS/ASME Test-SMAW (stick)**
Course Fee: $550.00
Registration Fee: $50.00

**ASME or API Pipe Welding Test**
Course Fee: $650.00
(certi/fication fee extra)
Registration Fee: $50.00

**Low Hydrogen Pipe Welding Test**
Course Fee: $650.00
Registration Fee: $50.00

**GMAW, FCAW**
Course Fee: $550.00
Registration Fee: $50.00

**GTAW**
Course Fee: $600.00
Registration Fee: $50.00

Technical Training Services

Lincoln Electric has a long history of providing customers with expert training on our various products, as well as general arc welding fundamentals. Our technical trainers have many years of experience in the welding industry and a very comprehensive knowledge of Lincoln Electric products and welding processes. They also have backgrounds in technical sales and/or technical support.

Lincoln Electric’s Technical Training Services group offers a variety of seminars and workshops, ranging from basic welding fundamentals training to high level programs on welding design issues and advanced Power Wave solutions. The team conducts various “train the trainer” seminars for welding educators. We also provide training for our authorized distributors who are at all levels of experience. Programs are held at both our headquarters in Cleveland, Ohio and in the field. Students spend about 50% classroom time and 50% hands-on lab time. Also included are tours of Lincoln Electric’s manufacturing and R&D facilities.

The Technical Training Services group also produces state-of-the-art training curriculum and materials for teaching arc welding. Many of this is available at a “no charge” basis for welding instructors.
Blodgett’s Seminars on the Design of Welded Connections

For over 60 years, Lincoln Electric has hosted design seminars that have provided the attendees with ideas of how to make welded products more dependable, lower in cost, and welded in a safe manner. Thousands of engineers have attended these seminars, made popular by Dr. Omer W. Blodgett after whom the seminars are named. Two application-focused design seminars are offered.

**BLOD401 - Design of Welded Connections: Steel Structures**

24 Clock Hours, 3.5 Days

This seminar is for individuals who design steel structures, such as buildings, bridges and towers. Attendees typically include structural engineers and others associated with welded structures, such as fabricators, erectors and inspectors. AISC 360 and AWS D1.1 standards are used to support the engineering principles presented in the course. Connections subject to static, cyclic and seismic loading are reviewed. Specific topics include the following:

- Weld Process Basics
- Basics of Welded Connections
- Details of Welded Connections
- Principles of Connection Design
- Welded Connections for Cyclic Service
- Welded Connections for Seismic Service
- How to Achieve Ductile Behavior
- Distortion: Causes and Cures
- Welding Metallurgy: Why Connections Crack and Tear

![Welded Structure Image]

**BLOD402 - Design of Welded Connections: Steel Weldments**

This seminar is for individuals who design equipment used for construction, agriculture, material handling and other general purposes. Attendees typically include design engineers and those associated with the production of steel weldments, such as manufacturing and welding engineers. AWS D14 standards are used to support the engineering principles presented in the course. Connections subject to static, cyclic and shock loading are reviewed, with concentrated emphasis on cyclic loading (fatigue). Specific topics include the following:

- Weld Process Basics
- Basics of Welded Connections
- Details of Welded Connections
- Principles of Connection Design
- Theory of Fatigue of Welded Connections
- Design of Fatigue Resistant Welded Connections
- Designing for Shock Loading
- Designing for Torsional Loading
- Distortion: Causes and Cures
- Welding Metallurgy: Why Connections Crack and Tear
- “Listen to the Steel”: (Learning From Failures)
- Fracture Mechanics: Theory and Practical Applications
- Practical Solutions to Common Construction Challenges
- Cost Reduction Ideas
- Welding Demonstration
- Plant Tour

![Welding Equipment Image]

**SEMINAR LEADER**

Duane K. Miller, Sc.D., P.E.
Manager, Engineering Services and Welding Design Consultant

Dr. Miller is a recognized authority on the design of welded connections. His enthusiastic teaching style and technical expertise have resulted in him being a much sought after speaker around the world. He is currently the Chair of the AWS D1 Structural Welding Committee, a member of the AWS D14 Committee, and a member of the AISC Specifications Committee. He has received numerous awards, including the AISC TR Higgins Lectureship Award and AISC Lifetime Achievement Award. He is a three times recipient of the AWS Silver Quill Award for excellence in his published work.
BTB301 - Beyond The Booth Instructor Course

Who Is It For?
34 Clock Hours, One Week
This course is designed for new welding instructors entering the classroom for the first time. Current welding instructors will also benefit from learning new instructional techniques and ways to engage students at a higher level.

What Is It?
A five day course limited to 48 participants that will be taught by both current welding instructors and guest instructors.

This course will cover curriculum design, lesson plan development, lab management, presentation skills, classroom management and more. The course is intended for new welding instructors at both the high school and community college levels. Participants will leave this workshop with the tools for a successful year teaching welding education.

What’s Included?
» Certificate of Completion
» All welding consumables and coupons
» Library of Lincoln Electric resources
» Morning snack and lunch daily
» Group dinner one night
» Plant tours

Code: BTB301
Duration: Five Days
Time: 8:00 a.m. - 4:00 p.m.
Course Fee: $799.25

Course Dates:
BTB301_19_01   3/11/2019 - 3/15/2019
BTB301_19_02   6/10/2019 - 6/14/2019
BTB301_19_03   7/15/2019 - 7/19/2019
**Welding Educator’s Workshops**

**Who Is It For?**
This course is geared for welding instructors who want to take welding education to the next level.

**What Is It?**
The program is a four day seminar, with an optional fifth day. The workshop is limited to 24 attendees that is approximately 60% classroom and 40% hands-on.

---

**WEW301 - Welding Educator’s Workshop**
**34 Clock Hours, 4.5 Days, 3.4 CEU’s**
This course will focus on utilizing new technologies to increase teacher competencies and knowledge related to welding and classroom principles.

---

**WEW302 - Advanced Welding Educator’s Workshop**
**34 Clock Hours, 4.5 Days, 3.4 CEU’s**
This course will focus on advanced technologies used in the welding industry and how they can be employed in a welding education program. Relevance around new technologies and classroom training to real world applications will be shared. A focus on Power Wave® technology and advanced trainers will be emphasized throughout this training.

Each of these classes will give you the tools to develop more interactive curriculum, an understanding of all career pathways in welding, and ways to integrate STEM into your program.

**What’s Included?**
- Certificate of Completion
- All welding consumables and coupons
- Library of Lincoln Electric resources
- Morning snack and lunch daily
- Group dinner one night
- Plant tours

“Welding with the Experts”
If interested, you are invited to stay through Friday to weld with Lincoln Electric Welding instructors to further sharpen your skills. Times for welding will be from 8:00 a.m. to noon.
VRTEX301 - VRTEX® Customer Training

Who Is It For?
15 Clock Hours, Two Days, 1.5 CEU’s
This course is designed for professionals and educators who teach welding using the VRTEX virtual reality training tool. Let Lincoln Electric show you how to put the latest education technologies to work!

What is It?
A FREE two-day seminar limited to 15 attendees that is approximately 50% classroom and 50% hands-on.

Location:
Lincoln Electric Welding Technology & Training Center
22800 Saint Clair Avenue
Cleveland, OH 44117

RSVP and More Information:
http://classes.lincolnelectric.com/modules

What is Included & Attire:
Welding Personal Protection Equipment (PPE) - helmet, jacket, gloves - will be provided.

---

**DAY 1:**

Welcome and Safety

Introduction to VRTEX® and Hands-On: Demo

Welding Procedure Specification (WPS)

Break

Hands-On Lab 1: Basic Operations

Instructor Mode

Changing Tolerances

Lunch

Automation Tour

Hands-On Lab 2: Changing Tolerances

---

**DAY 2:**

VRAW™ Curriculum – Education Services

Upgrades

Hands-On Lab 3: Upgrades

Break: Travel To Corporate Headquarters

Machine Division Tour

Lunch

Preventive Maintenance and Troubleshooting

Break

Complete Labs

Survey and Program Close
RWELD301 - REALWELD® Customer Training

Who Is It For?
15 Clock Hours, Two Days, 1.5 CEU’s
These courses are intended to allow new REALWELD® customers to get familiar with the system’s components, calibration, operation and system administration.

What is It?
A FREE two-day seminar limited to 15 attendees that is approximately 50% classroom and 50% hands-on.

Location:
Lincoln Electric Welding Technology & Training Center
22800 Saint Clair Avenue
Cleveland, OH 44117

RSVP and More Information:
http://classes.lincolnelectric.com/modules

What is Included & Attire:
Welding Personal Protection Equipment (PPE) - helmet, jacket, gloves - will be provided. Your own personal appropriate welding apparel is required – long pants, steel toe shoes, etc.

Code: RWELD301
Duration: Two Days
Time: 8:00 a.m. - 4:30 p.m.
Course Fee: FREE

Course Dates:
RWELD301_19_01  2/7/2019 - 2/8/2019
RWELD301_19_02  4/11/2019 - 4/12/2019
RWELD301_19_03  6/20/2019 - 6/21/2019
RWELD301_19_04  8/8/2019 - 8/9/2019
RWELD301_19_05  10/17/2019 - 10/18/2019
RWELD301_19_06  12/12/2019 - 12/13/2019

DAY 1:
- Introductions and Safety Video
- Introduction to REALWELD® System
- User Demo and components of the REALWELD® System
- Hands-On Lab 1: Instructor Set-up, Create and Maintain Welding Procedure Specification (WPS), Curriculum and Users
- Calibration
- Lunch
- Hands-On Lab 2: User Operation
- Import/Export
- Review, Program Close

DAY 2:
- Day 1 Review / Educational Services
- REALWELD® Desktop Setup/ Import - Export
- Hands-On Lab 3: Desktop Setup/ Import - Export
- Break
- Demo - Creating Master Weld / Hands-On Lab 4
- Machine Division / Weld School Tour (optional)
- Lunch
- Demo - Changing Audio and Adding Supplemental Material / Hands-On Lab 5
- Review / Quiz / Survey / Program Close
**Automation School Training**

**Course Offerings/Prerequisites**

All courses are conducted in a lecture-lab format. Since seating capacity is limited, early registration is advised. Students attending any Advanced Robotic Programming Course are expected to have successfully completed the Basic Robotic Programming Course.

Transportation will be furnished to and from Lincoln each day only to the Lincoln authorized hotel [Cleveland schools only]. If you are staying in another location you will be responsible for your own transportation.

If you are attending our Power Wave® or Robotic Service Shop Courses, we suggest that you take the Entry Level Standard Course Exam found at the Lincoln Electric website. This exam will evaluate your electrical skill level necessary to pass the course. The Standard Level Test can be found on the Service School page: http://www.lincolnelectric.com/en-us/education-center/seminars-and-workshops/Pages/service-school.aspx.

**All registration and questions for Lincoln Electric Automation School Training is via phone at 1-888-935-3878.**

A confirmation email will be sent once registration is complete. Please note that classes fill up quickly. Register at least 6 weeks in advance of the course start date in order to assure the best chance of getting into the class of your choice. Courses will be held if three or more students enroll. All cancellations must be done via email at least 10 days prior to the class start date. Any cancellations with less than one week notice from the course start date will be charged the course fee.

Notes:
- Additional training options including Touch Sensing, Thru-Arc Seam Tracking, and Vision will be covered on Thursday and Friday of the Basic training week. Check availability of Basic Training Program during holiday weeks (typically no class).
- All classes end by Noon Friday.
- WeldPro™ Training does not include customer model of system.

(1) Cancellations made within two weeks of the class start date will not be refunded.
Basic Robotic Programming

Course Duration
The duration is 3 days. Frequency of course offering weekly Monday through Wednesday. If you have purchased additional options such as Touch Sensing, and Thru-Arc-Seam-Tracking, you will be scheduled for 1-2 additional days for these options.

Robotic Programming Training Course Prerequisites
The robotic programming training course is conducted on a combination lecture-laboratory basis. Typically, students are grouped (2) per robot and work as a team in performing the hands-on exercises. The course is intensive. Students attending are expected to have some experience in one or more of the following:

Welding, Electrical, Computer, C.N.C
Prior robot programming experience is a plus. Assignments are made which require some evening study. The proper selection of the employees to be trained and their interest in being trained are critical success factors in any robot installation.

Students should have experience in GMAW and welding processes. The basic robot programming class is geared towards programmers responsible for maintaining their systems.

Course Objectives
Participants will be able to:
» Safety precautions while programming and operating the robot system
» Fundamental of teach pendant and arc tool programming language
» Structured programming language techniques and edit commands
» Instructional commands and menu structure
» Operator controls and indicators on the teach pendant and operator panel
» Correct positioning of the robot using the teach pendant and various motion types
» Welding program structure and operation including straight line, circles, and weaving fundamentals
» Proper editing procedures and programs commands and functions
» Basic error recovery
» Torch and wrist alignment checks
» How to setup a Tool Center Point
» Home program, Zero program
» Backing up programs to a memory card
» Setting up a jog frame
» Wait and timer instructions
» Program copy, delete, comment and write protect
» Torch cleaning program (option)
» Password protect (option)
» Turntable (option)

Duration: Three Days
Course Fee: $1,600.00

Advanced Robotic Programming

Course Duration
The duration is 5 days.
Frequency of course offering 4 times per year.

Course Description
A 5-day training program covering advanced tasks and procedures that an operator, technician, engineer or programmer needs to maximize productivity and quality with a Lincoln/FANUC®-RJ-Series Robotic Welding System. Class size is limited to 12 participants.

Course Prerequisites
The person attending must have completed the Lincoln Electric Automation Basic Robotic Programming Course.

Course Objectives
» Edit programs while another is running
» Make temporary adjustments to weld points to compensate for batch runs
» Make on-the-fly changes to weld procedures
» Copy/Shift programs to new locations to reduce programming time.
» Add explanatory text to programs including custom alarm messages
» Full controller memory backup and restore
» Use tool offset utility to minimize programming when changing to new style of torch
» Use Find, Replace, Copy and Paste commands
» Setup the Reference Position Utility to establish a safe position for the robot
» Change weld procedures in the middle of weld
» Monitor weld command and feedback signals
» Use Test Cycle to speed up the programming testing process
» Use logic instructions to simplify programming of parts with multiple, similar weld joints
» Setup/incorporate a User Frame into programming
» Fast Start
» APPLIED ROBOTIC WELDING:
  • Modes of Metal Transfer
    - Short-Arc Transfer
    - Globular Transfer
    - Axial Spray Transfer
    - Pulsed Spray Metal Transfer
    - Surface Tension Transfer® (STT®)
    - Power Mode
    - RapidArc™
    - Pulse-on-Pulse®
    - Tandem MIG®
    - Synchronized Tandem MIG®
• Effects of Variables
  - Torch angles
  - Various shielding gases
  - Current density
  - Electrode efficiency
  - Deposition rate
  - Electrode extension and Contact Tip To Work Distance (CTWD)
• Recognition and Recovery from Common Weld Discontinuities
  - Porosity
  - Spatter
  - Undercut
  - Incomplete Fusion/Inadequate Penetration
  - Incorrect weld shape and size
• Basic System Maintenance

Duration: Five Days
Course Fee: $2,800.00

Course Dates:
2/18/2019 - 2/22/2019
4/8/2019 - 4/12/2019
6/24/2019 - 6/28/2019
7/29/2019 - 8/2/2019
10/7/2019 - 10/11/2019
12/9/2019 - 12/13/2019

Any Questions?
Contact our Automation School Coordinator at: (888) 935-3878

Note: Cancellations made within two weeks of the class start date will not be refunded.
Robotic Service Training

Course Duration
The duration is 5 days.
Frequency of course offering 2 times per year.

Course Description
An intensive training program covering schematic level theory, disassembly and reassembly, as well as electrical troubleshooting on a Fanuc® robot and controller.

This course is intended for persons who must perform electrical and mechanical maintenance and troubleshooting as well as performing preventative maintenance.

Prerequisites
Students should have previous training with electrical/electronics, previous training/or experience in related field involving mechanical disassembly, repair and assembly.

Daily Schedule
DAY 1
» Registration and Welcome
» Robotic Safety Considerations
» Basic Programming Lab
» Motion Fundamentals
» Program Editing
» Weld Programming
» Preventative Maintenance
» Using a Memory Card to Download/Upload Programs
DAY 2
» Tool Frame Setup
» Setup and Operation of Torchmate Option
» Power Wave® Setup
» Operator Stand/Safety Equipment Setup and Operation
» Home Program
» Zero Program
DAY 3
» Overview of Robot Controller and Mechanical Arm Unit
» Block Diagram-Level Theory of Operation
» Schematic-Level Theory of Operation
» Disassemble and Detail of Robot Controller
» Fault Assessment/Troubleshooting
DAY 4
» Mastering/Calibration of Robot Arm
» Full Controller Memory Backup and Restore
» Installing Software
» Replacing Motors and Encoders
DAY 5
» Auxiliary Axis
» Local Stop Circuit
» Review

Note: Cancellations made within two weeks of the class start date will not be refunded.
WeldPRO™ – Offline Robot Programming

Course Duration
The duration is 2 days. Frequency of the course is 4 times per year. Onsite training taught on an as-requested basis.

Course Description
WeldPRO™ is FANUC® Robotics’ plug-in to the RoboGuide off-line programming tool, allowing users to simulate a robotic arc welding process in 3-D space. Driven exclusively by a FANUC® Robotics Virtual Robot Controller, WeldPRO™ is empowered with the most accurate program teaching tools and cycle time information available in any simulation package.

A user can easily navigate through WeldPRO™ to create complete workcells by importing actual tooling and workpiece CAD files. Anyone familiar with programming a FANUC® robot will be able to easily create new weld paths with proper torch angles and process parameters. All programs and settings from the virtual workcell can be transferred to the real robot to decrease installation time.

Prerequisites
The person attending must have completed the Lincoln Automation Basic Robotic Programming and System Training Course.

Main Topics
» Software Introduction — Getting Started with WeldPRO™ Roboguide Features
» Creating Workcells — Using The Workcell Creation Wizard
» The Cell Browser
» End of Arm Tooling
» Using the Navigation — Zooming, Panning and Rotating the View
» Jogging the Robot
» Using the Move to Quick Bar — Move to Retry Function
» Adding Objects Using the Cell Browser — Selecting Objects and Using the Objects Property Page
» Working with Fixtures
» Working with Parts — Creating a Robot Program
» Automatic Path Generation (Cad to Path) — Using Features and Segments
» Running a Program
» Using the Virtual Teach Pendant
» Workcell Calibration
» Building a Positioner — Building an Aux Axis and Programming a Positioner
» Defining Coordinated Pairs — Procedure to Use Actual Robot Data
» Using the FANUC® License Manager
» Setting Weld Angles
» Programming Circles

Duration: Two Days
Course Fee: $2500.00 at Lincoln Electric, $2500.00 per day on site (Two Day Minimum)

Course Dates:
1/23/2019 - 1/24/2019
3/20/2019 - 3/21/2019
5/15/2019 - 5/16/2019
7/24/2019 - 7/25/2019
9/18/2019 - 9/19/2019
11/13/2019 - 11/14/2019

Any Questions?
Contact our Automation School Coordinator at: (888) 935-3878
Field Service Shop Training

What Is It?
Lincoln Electric offers a variety of training courses for our network of authorized field service shops. The courses cover detailed instruction on how to troubleshoot and repair various Lincoln Electric welding equipment. They also include discussions on basic electricity and welder components, basic circuitry and theory of operation. In addition there are instructions on using Lincoln Electric’s Service Navigator software and completing warranty repair claims. The classes are approximately 50% classroom instruction and 50% hands-on demonstrations and practice in the repair lab. The courses are offered at both our world headquarters in Cleveland, Ohio and at various District Sales Office locations throughout North America.

Who’s It For?
These courses are intended for the service and repair personnel at all authorized field service locations. Courses vary from standard training for newer, less experienced technicians, to advanced training on high technology products and robotics for veteran technicians. New product courses are also offered to keep your shop updated on the latest Lincoln Electric equipment.

All Registration For Lincoln Electric Service School is Online. Go to: www.lincolnelectric.com/serviceschool
For Questions or Complete Information: Contact our Service School Coordinator at: (216) 383-2310 or (888) 935-3877 or www.lincolnelectric.com/serviceschool
Regional Programs

Lincoln Electric conducts several training seminars at various locations around North America that have been arranged by our local District Sales offices. Courses vary in length from 1/2 day to one week. These programs cover various topics, including, but not limited to, State Welding Educator Workshops, Power Wave® technologies seminars, Power Wave® AC/DC 1000™ seminars, Distributor Training programs and Service School programs.

Requirements
Depending upon the course, there may be minimum attendance and/or fee requirements.

For more information on course dates and type(s) of training being provided locally, please contact your Lincoln Electric District Sales office.
Arc Welding Process Training Materials

The Lincoln Electric Company is dedicated to the advancement, training and safe practice of the art and science of arc welding.

One of the main initiatives in this effort is the production and distribution of some of the most effective training materials in the industry. These materials are made available for little or no cost to welding instructors and include:

U/LINC® Curriculum

- Stop spending your time developing curriculum
  - Use U/LINC AWS SENSE and state competency-aligned materials
- Over 18,000 pages of lesson plans, student assessments, lab activities, videos and presentations
- Know exactly which state competencies will or will not be met by your program
- For more information visit: education.lincolnelectric.com/ulinc

Other Training Materials

- Posters, welding & process guides, and books
- Order posters individually or as the "Educators Poster Pack (BK-296).

For more information, contact us at educationalsales@lincolnelectric.com
James F. Lincoln Foundation

TEACH IT
The Arc Welding Bookshelf
The James F. Lincoln Arc Welding Foundation was created “to encourage and stimulate scientific interest in and scientific study, research and education in respect of the development of the arc welding industry through advance in the knowledge and design and practical application of the arc welding process.” The Foundation produces and publishes books and other educational materials as a non-profit service to the industry.

BUILD IT
Welding Project Kits
These pre-cut kits provide a fun way for students to try their hand at welding. A clear, step-by-step guide is included.

WIN IT
Welding Awards Program
The Foundation awards over $45,000 in cash and prizes each year to the winners of its welding design project contests, as well as the state and national SkillsUSA welding competition winners. Visit, www.jflf.org for details on specific contest rules, regulations and application forms.

Visit JFLF.org
James F. Lincoln Foundation Arc Welding Bookshelf
A Few of the Popular Textbooks and Videos

The Procedure Handbook of Arc Welding (PH)
14th Edition
Published by The James F. Lincoln Arc Welding Foundation
With over 500,000 copies of previous editions published since 1933, the Procedure Handbook is considered by many to be the “Bible” of the arc welding industry. The hardbound book contains over 750 pages of welding information, techniques, procedures, photographs, drawings and charts. Much of this material has never been included in any other book. A must for all welders, supervisors, engineers and designers. Many welding instructors will want to use the book as a reference for all students.

Metals and How to Weld Them (MHW)
2nd Edition
by T.B. JEFFERSON and GORHAM WOODS
This book describes the internal structure of metals and its relation to mechanical and physical properties and weld ability. This dual purpose textbook and reference manual is written in non-technical language so students, welders, supervisors, engineers and educators will easily understand all data. The 400 page book is 6”x9” with gold embossed hard cover.

Arc Welded Projects, Vol. V (AP-V)
Published by The James F. Lincoln Arc Welding Foundation
The projects described in this 200 page book represent the range of entries submitted in the James F. Lincoln Arc Welding Foundation Award Programs both as to the type and size of the project, and the nature of the descriptive information included. Each project is detailed, including prints and bills of material, so the do-it-yourself person can understand and build these helpful projects. It also provides great ideas for welding school class projects. Arc Welding Projects I through IV also available.

Learn To Weld – The Lincoln Way: An excellent visual guide for shielded metal arc welding. This tape concentrates on the fundamental techniques of horizontal, vertical up, and overhead welding. Safety section and technical welding guides included. Running Time: 18 minutes. ED201 DVD, $10.00

Welding – Making It Happen: An excellent video portraying how welding affects our daily lives. Great for teachers and career counselors with students, parents, and the general public. Produced by N.E.M.A. Running Time: 16 minutes. ED204 DVD, $10.00

Welding Safety: Thorough presentation on general shop safety, hazards in the workplace, and information on the subject of welding safely. MC15-156 Interactive DVD, Pay $5.00 S. & H. only

Introduction to Semiautomatic Wire Welding: Provides the fundamental expertise necessary to successfully apply both gas-shielded and flux-cored welding wire. Running Time: 41 minutes. ED211 DVD, $10.00

Basic Electricity for Arc Welding: Introduces the beginning welder to basic component parts and terminology of arc welding. Running Time: 9 minutes. ED222 DVD, $10.00

Introduction to Inverter Technology: Inverters reflect the trend in industry for greater efficiency and higher quality welding machinery with inverters being designed to satisfy that demand. Running Time: 28 minutes. ED223 DVD, $10.00
HOTEL AND CONTACT INFORMATION

For Welding School Attendees
For students staying long term, several residents near the Lincoln Electric Welding School have rooms for rent. Prices range from $40 to $100 per week—room only, no board. Contact the Lincoln Electric Welding School for a list of homes. Make arrangements in advance of your arrival in Cleveland. Meals are available at nearby restaurants. Lincoln Electric’s cafeteria serves noon meals at a very reasonable price.

Introduction
Welcome to the Lincoln Electric Welding School. We know you have many options when choosing a welding school and we thank you for choosing ours. Please review the following policies of our institution on the preceding pages. All policies listed apply to students enrolled in our programs at the Lincoln Electric Welding School. Please familiarize yourself with our policies before your first day of class.

If you have any questions regarding our policies or programs, please contact the school by phone 844-818-6038 or by e-mail weldtraining@lincolnelectric.com.

Nothing in this policy is intended to create a contract, including without limitation a contract of employment, either express or implied. Completion of our program should not be construed as a guarantee of employment placement of any kind.

The Lincoln Electric Welding School Mission Statement
To Proactively Provide World Class Leadership and Support for Welding Training through Industry Leading Materials, Programs, Information and Products.

Lincoln Electric Welding School Approvals
The Lincoln Electric Welding School is approved by the Ohio State Board of Career Colleges and Schools (School Number: 71-02-0059T) and accredited to provide International Association for Continuing Education and Training (IACET) Continuing Education Units.

Facility Information
Location
Welding Technology & Training Center
22800 Saint Clair Avenue
Cleveland, OH 44117

Hours (Eastern Time)
Unless otherwise noted, classes are:
8:00 a.m. - 2:30 p.m. Monday - Friday

Instructor Office Hours:
3:00 - 4:00 p.m. Monday - Friday
Hours are subject to change.

Tours
Tours are offered by appointment Tuesday, Wednesday, and Thursday 1:00 p.m. to 3:00 p.m. Eastern time. Please call the Lincoln Electric Welding School office at 844-818-6038 to schedule an appointment. Closed-toe shoes must be worn.

Cafeteria
The cafeteria is available to students Monday through Friday from 7:30 a.m. until 2:30 p.m.

Welding Lab
The welding lab is available to students ONLY during class hours. The fume control system will be turned off before class, after class and during lunch. Students are not allowed to weld or grind when the fume control system is off. Welding is only allowed in authorized areas as indicated by the instructor.

Students are prohibited from bringing the following into the welding lab:
• Headphones / ear buds
• Food
• Beverage in an open container

Parking
Students will receive a temporary parking pass on the first day of class. Parking passes should be placed on the dashboard of your vehicle, visible to security. The Lincoln Electric Welding School is not responsible for damage to a vehicle, theft of the vehicle or any part of the vehicle, or loss of personal items from the vehicle while in the parking lot.
Holidays
The Lincoln Electric Welding School is closed on the following holidays:
• Good Friday
• Memorial Day
• 4th of July
• Labor Day
• Thanksgiving Day
• Christmas Eve/Christmas Day
During holiday weeks, the normal class hours will be extended. The Lincoln Electric Welding School will close for the last two weeks of December.

Non-Discrimination Policy
The Lincoln Electric Welding School prohibits discrimination on the basis of race, color, gender, national origin, ethnicity, religion, age, disability, veteran status, sexual orientation, gender identity or expression, or genetic information, or any other condition or status protected by law. In addition, the School prohibits harassment based on any of these protected categories, including but not limited to sexual harassment. It is the responsibility of the Lincoln Electric Welding School to ensure that all individuals involved in the administration, development, and delivery of learning events are familiar with Lincoln Electric’s discrimination policy. The School will make reasonable accommodations for individuals with known disabilities or religious needs unless doing so would result in an undue hardship to the School or would create a direct threat of safety to other individuals.

The Lincoln Electric Welding School does not condone or practice discrimination of any kind pertaining to groups or individuals based on these protected categories. This policy applies to all aspects of our programs, including admissions, recruitment, advancement, instruction, evaluation, counseling, and financial assistance. Our organization values and respects the dignity and worth of individuals within our academic community. This institution believes in and is committed to equal opportunity based on the fundamental reason that every person is valuable. It is our desire to have appropriate conditions for learning and working so that students can strive to achieve his or her own optimum potential in the work force and in society as a whole.

Anyone who experiences or witnesses unlawful discrimination or harassment should report his or her concerns to the Program Manager of the Lincoln Electric Welding School, or any instructor or official of the School. The School strictly prohibits retaliation against persons for raising concerns about discrimination, sexual harassment, or harassment based on another protected category. Violation of this policy may result in disciplinary action up to and including dismissal.

Admission Policy
Admission to the Lincoln Electric Welding School's career training programs are open to anyone with a high school diploma, GED or high school equivalency diploma.

Applicants that have received a high school diploma from an on-line secondary program or correspondence school may be required to provide transcripts and/or proof that the program is:
A) Accredited by accrediting agency recognized by the U.S. Department of Education
B) Authorized to offer online or correspondence high school diplomas by the state they are located in.

If an applicant is not accepted into the training program, all monies paid towards their enrolment shall be refunded. Refunds for books, supplies and consumable fees shall be made in accordance with Ohio Administrative Code section 3332-1-10.1.

Non-career training courses may have their own admission requirements. For further information regarding non-career training admission requirements, please see the course descriptions in the catalog.

Accessibility Services
Eligible students seeking reasonable accommodations for their classes and/or programs at the Lincoln Electric Welding School, must provide the following:
• A written request stating what accommodation they are requesting and why the accommodation is needed
Students are responsible for requesting accommodations and providing documentation. Reasonable accommodations will not be provided without documentation. The School will evaluate all requests for accommodations on a case-by-case basis. Questions regarding this process should be directed to the Program Manager of the Lincoln Electric Welding School.

Admission Process

Classes/Programs:
1. Register on-line at: classes.lincolnelectric.com/modules
2. Pay registration fee and tuition during registration
3. Student receives a confirmation e-mail*
4. Student attends first day of class
   * Please note, students enrolled in Basic Plate and Sheet Metal Welding must complete the Student Consumer Information Orientation on the first day of class.

Comprehensive Program:
1. Apply on-line at: classes.lincolnelectric.com/modules
2. Upload high school transcript during application process
3. Pay registration fee and tuition during registration
4. Student receives an acceptance e-mail
5. Student attends first day of class and completes the Student Consumer Information Orientation

Students are advised not to make travel arrangements until their reservation for a course or program has been confirmed.

Dismissal Policy
A student can be dismissed from a course or program based on academic achievement (poor grades), poor attendance and/or unacceptable behavior. Please see the Grade Policy (page 45), Attendance Policy (page 43) and Personal Conduct (page 47) section for further information.

Re-admittance Policy
A student who is dismissed from the Lincoln Electric Welding School due to grades, attendance or behavior, may submit a written petition to the Program Manager of the Lincoln Electric Welding School to be re-admitted. Student petitions will be considered on a case-by-case basis and re-admittance will be solely at the discretion of the Program Manager of the Lincoln Electric Welding School.

Re-admitted students will be required to complete a Student Improvement Plan with the Program Manager of the Lincoln Electric Welding School. The plan will outline the criteria for the student’s continued enrollment in the program/class. Please note, the criteria for attendance and/or grades may be more rigorous than the minimum attendance and grades listed in the Attendance and Grades policies. The re-admitted student must meet the criteria listed on the Student Improvement Plan or the student will be dismissed from the program/class.

If a student is dismissed a second time from the Lincoln Electric Welding School, the student will not be allowed to re-enroll in a program/class for twelve consecutive months. After twelve months, the student will be allowed to petition the Program Manager of the Lincoln Electric Welding School for re-admittance.

A student will not be considered for re-admittance if he/she owes a balance for a prior course/program taken at The Lincoln Electric Welding School. The student will be required to pay the balance before submitting a written petition.

Transfer Credit Policy
Credit(s) granted at another institution cannot be utilized towards the completion of The Lincoln Electric Welding School’s Comprehensive Program and/or other courses/programs.

Attendance Policy
Attendance will be taken at the start of each class. The Lincoln Electric Welding School attendance policy is driven by the expectations of industry: While 100% attendance is ideal, students must be in attendance for at least 90% of each program or course attempted in order to be awarded a certificate of completion.
In the event a student cannot attend class, the student is expected to notify his/her instructor or the Lincoln Electric Welding school personnel immediately by phone or email or both. Instructors can be notified between the hours of 7:30 a.m. and 4 p.m. Monday through Friday at 844-818-6038 or by e-mail at weldtraining@lincolnelectric.com.

If a student meets one or more of the following criteria during their enrollment in a Lincoln Electric Welding School course or program, he/she will be dismissed from his/her enrolled program:

• The student is absent the first day of a course or program
• The student misses more than 3 hours of a 1 week course
• The student misses more than 6 hours of a 2 week course
• The student misses more than 18 hours of a course that is 6 weeks in length or more
• The student misses more than 18 hours in the Comprehensive Program
• The student misses more than 10% of any given seminar, program or customized course
• The student is tardy 3 times during a course and/or program

The Program Manager of the Lincoln Electric Welding School may grant exceptions to the above policy on a case-by-case basis.

A student that is dismissed from a course/program due to attendance, grades, or behavior will be subject to the Lincoln Electric Welding School Refund Policy. The last day of attendance will be the official date of dismissal given to the student by the Program Manager of the Lincoln Electric Welding School.

**Excused Absence**

A student enrolled in a course/program more than 100 clock hours in length that is ill, caring for ill dependents has a family emergency or a reasonable justification as to why they could not come to class may be eligible for an excused absence. An excused absence will not count towards the maximum amount of time a student can miss before being dismissed from a program. It is at the Program Manager’s discretion as to whether a student’s absence can be counted as an excused absence. Documentation may be requested when deciding whether or not a student’s absence is excused.

- A student cannot utilize an excused absence to miss the first day of class.
- A student can only utilize 2 excused absences (equal to 2 instructional days) in a course more than 100 hours in length.

**Tardiness**

Students are expected to be on time for class, both upon arrival in the morning and return from lunch in the afternoon. Each class will begin promptly at the time specified on the schedule. Students must be inside the classroom, prepared with all needed materials when class starts.

Students who are more than 5 minutes late after the class has started will be considered tardy. Tardiness is recorded as an absence in a student’s attendance record. All absences are recorded in 15 minute increments.

Students that are going to be tardy due to an emergency are expected to notify their instructor or Registration at 844-818-6038.

Consequences for a student being tardy include but are not limited to:

- 1st offense: Instructor issues verbal warning
- 2nd offense: Incident is recorded in student’s record
- 3rd offense: Student is dismissed from remainder of class and must retake the whole class or program at their own expense

The Program Manager of the Lincoln Electric Welding School may grant exceptions to the above policy on a case-by-case basis.

A student that is dismissed from a course/program due to attendance, grades, or behavior will be subject to the Lincoln Electric Welding School Refund Policy. The last day of attendance will be the official date of dismissal given to the student by the Program Manager of the Lincoln Electric Welding School.
Missed Assignments
If a student has an excused absence, it is their responsibility to check with the instructor as to what coursework they missed. Students that have excused absences will be allowed to make-up tests and/or graded projects given when they were absent. Students with unexcused absences will not be allowed to make-up coursework missed and will be given a zero for the assignment/project or test.

Leave Of Absence
Students who require extended leave must provide written notification to the Program Manager of the Lincoln Electric Welding School. Requests for leave will be considered on a case-by-case basis.

Grades
During and at the end of each program, written tests and welding samples will be assessed to determine the student’s ability to successfully complete and pass each program. Weld samples are tested to AWS, ASME and API welding codes. Written tests are graded on the following scale:
A = 100 – 90%
B = 80 – 89%
C = 70 – 79%
D = 60 – 69%
F = 59% or below and will not pass the school’s standards.
To receive a certificate of completion for attending the Lincoln Electric Welding School, students must earn a minimum of a 70% average on exams and welded specimens. If a student falls below the minimum 70% average, he/she will be dismissed from the program.

Graduation Requirements
To receive a certificate of completion from the Lincoln Electric Welding School, students must be in attendance a minimum of 90% of their course or program and receive a minimum of a 70% average on exams and welded specimens.

Tuition and Fees
Tuition for an individual class includes training handouts, welding consumables and steel practice coupons (also stainless steel and aluminum when applicable). If a student wishes to complete an AWS qualification/certification, additional charges will apply.

Payment
For classes under 300 clock hours, full tuition is due two weeks prior to the first day of class. If payment is not received, the student will be removed from the class.

Classes that are more than 300 clock hours are broken into two academic terms, but tuition payments are due in four equal payments.
· One fourth of the class tuition is due along with the registration fee, two weeks prior to the first day of class.
· The second payment will be due after the student has completed 150 clock hours of the program.
· The third payment is due after the student has completed 300 clock hours of the program.
· The final payment is due after the student completes 450 clock hours.

Failure to make a payment on-time will result in the student being removed from the course/program.

Payment is due in full if a student withdraws or is dismissed from a course/program.

We accept VISA and MasterCard. Any questions regarding payment(s) can be directed to the Lincoln Electric Welding School at weldtraining@lincolnelectric.com or by phone at 844-818-6038.

Veterans Benefits
Students who qualify for veterans’ educational benefits are able to utilize their benefits to fund The Lincoln
Electric Welding School's Comprehensive Program and Basic Plate and Sheet Metal Welding Class.

Veterans Refund Policy
In the event that veterans or their eligible persons sponsored as students under Chapters 30, 32, 35 of Title 38 and Chapter 1606 or Title 10 U.S. Code, fail to enter the Program or withdraw or are discontinued therefrom at any time prior to completion, the amount charged for tuition, fees and other charges shall not exceed the approximate pro rata portion of the total charges for tuition, fees and other charges that the length of the non-accredited program bears to its total length. A registration fee of $10 need not be refundable: any amount beyond that is subject to pro ration and refund (CFR21.4254(c) (13)). The pro rata portion may not vary more than 10 percent of the total costs for tuition, fees, and other charges.

A copy of this policy will be provided to all students receiving educational benefits from the Veterans Administration.

Refund Policy – Tuition Charges in the Event of Withdrawal/Dismissal
Academic terms are measured in increments of 300 clock hours. Any programs less than 300 clock hours in length has one academic term. The Lincoln Electric Welding School Comprehensive Program is 600 clock hours in length, which means it consists of two academic terms. Our refunds for tuition and refundable fees is made by academic term in accordance with following provisions as established by Ohio Administrative Code section 3332-1-10:

(1) A student who withdraws before the first class and after the 5-day cancellation period shall be obligated for the registration fee.
(2) A student who starts class and withdraws before the academic term is 15% completed will be obligated for 25% of the tuition and refundable fees plus the registration fee.
(3) A student who starts class and withdraws after the academic term is 15% but before the academic term is 25% completed will be obligated for 50% of the tuition and refundable fees plus the registration fee.
(4) A student who starts class and withdraws after the academic term is 25% complete but before the academic term is 40% completed will be obligated for 75% of the tuition and refundable fees plus the registration fee.
(5) A student who starts class and withdraws after the academic term is 40% completed will not be entitled to a refund of the tuition and fees.

The appropriate refund will be made within thirty calendar days of the date the school is able to determine a student has withdrawn or has been dismissed from a course/program. Refunds shall be based upon the last date of a student’s attendance or participation in the course/program.

A student that is dismissed from a course/program due to attendance, grades, or behavior will be subject to the Lincoln Electric Welding School Refund Policy. The last day of attendance will be the official date of dismissal given to the student by the Program Manager of the Lincoln Electric Welding School.

Right to Cancel Policy
If a student registers and enrolls in a course, he/she may drop the course within five calendar days after the date of enrollment. The student must request a drop online through the Lincoln Electric class registration website and a member of the Lincoln Electric Education Team will contact the student within 3 business days to process the request.

If such cancellation is made, the school will promptly refund in full all course and registration fees paid for the course/program and the refund shall be made no later than thirty calendar days after cancellation. This provision shall not apply if the student has already started the course/program.

Cancellation Policy
Applicants that have registered for a course/program that is cancelled by the Lincoln Electric Welding School shall have all tuition and fees, including the registration fee, refunded by the school.
If such cancellation is made, the School will refund in full all course and registration fees paid within thirty calendar days of the cancellation.

Transfer of Fees
Registration fees are typically nonrefundable after five days of a student registering, however, they may be transferred to another course/program. An applicant can transfer his/her registration fee to another course/program if the school is notified before the first day of his/her original course/program. The registration is forfeited if the student needs to reschedule a second time or if the student notifies the school of his/her intent to change class/program after the original course/program has started.

If a student pays a registration fee of a higher dollar amount than the registration fee of the course it was transferred to, the difference will be allocated to the course fee.

Example: If a student pays a registration fee of $100 and needs to change the course. The new course registration fee is $50. The student will have a $50 credit that will be used for the course fee. If course fee is $500, the student would have a remaining balance of $450.

Data Privacy, Personal Information and Student Records
For information regarding how the Lincoln Electric Welding School collects, uses, and discloses a student’s personal information, please see our Student Privacy Notice and Policy at: https://www.lincolnelectric.com

The Student Privacy Notice and Policy also describes how a student requests access to their student records or authorize the disclosure of such information to a third party.

By providing your personal information to the Lincoln Electric Welding School, you hereby acknowledge, understand and agree to the nature, manner and scope in which we collect, use, and disclose your personal information, as set forth in this Student Privacy Notice and Policy.

Personal Conduct
All participants are expected to conduct themselves in a respectable manner at all times. Misconduct such as fighting, harassment, use of illegal drugs or alcohol, or carrying of weapons will not be tolerated and will result in automatic dismissal from the Lincoln Electric Welding School.

Deliberate damage, theft, or any vandalism to tools, equipment or facilities will not be tolerated and will result in automatic dismissal from the Lincoln Electric Welding School. Students responsible for these offenses may be prosecuted.

A student that is dismissed from a course/program due to attendance, grades, or behavior will be subject to the Lincoln Electric Welding School Refund Policy. The last day of attendance will be the official date of dismissal given to the student by the Program Manager of the Lincoln Electric Welding School.

Cell Phones and Other Personal Data Devices
Personal data devices and electronics can be utilized for classroom and lab work, however, students may be asked to discontinue use or to leave the class if their personal data devices or electronics are disruptive or distracting.

Photo and Recording Policy
Pictures or videos may not be taken anywhere on company property unless approved by the Lincoln Electric Welding School manager. In addition, the use of audio recording devices is prohibited.

Alcohol and Illegal Substances
Students cannot consume, show evidence of having consumed, possess or use any alcoholic beverages or illegal drug[s] at the Lincoln Electric Welding School or on the surrounding property. Illegal drugs include marijuana regardless of whether the student possesses a valid medical marijuana card. A student that is taking a prescription drug that may impair their ability to function in the welding lab must notify and consult with the Program Manager of the Lincoln Electric Welding School.
Evidence of consumption, usage or possession of alcohol or illegal drugs will lead to expulsion from the Lincoln Electric Welding School and possible notification of law enforcement.

**Dangerous Weapons**
Regardless of having a concealed/carry weapons license or permit, students are prohibited from carrying or having firearms or weapons in the Lincoln Electric Welding School.

**Tobacco Policy**
Smoking, vaping, and chewing tobacco are strictly prohibited in the Welding Technology and Training Center and surrounding parking lot. (Students should ask their instructor for designated smoking areas outside of the WTTC’s facility.)

**Lincoln Electric Weld School Phones, Computers and Devices**
Personal calls are prohibited on Lincoln Electric Welding School phones. Likewise, students may not use School computers and devices for personal activities unless authorized in advance. The School retains the right to access all data and information on School phones, computers, and devices. Students retain no expectation of privacy when using School Phones, Computers, or Devices, or when accessing school networks and servers, such as email, on personal devices.

**Restricted Areas**
Unless accompanied by an instructor, all areas of the distribution center are off limits. Furthermore, the Lincoln Electric Welding School or training labs should not be occupied unless accompanied by an instructor.

**Grievance Procedure**
All student complaints should be first directed to the school personnel involved or the Program Manager of the Weld School. If no resolution is forthcoming, a written complaint shall be submitted to the Program Manager of the Lincoln Electric Welding School. Whether or not the problem or complaint has been resolved to his/her satisfaction by the school, the student may direct any problem or complaint to the Executive Director, State Board of Career Colleges and Schools, 30 East Broad St, Suite 2481, Columbus, Ohio, 43215, Phone 614-466-2752; toll free 877-275-4219.

**Lincoln Electric Weld School Number:** 71-02-0059T

**Safety**
All participants will be required to wear basic safety gear at all times in the Lincoln Electric Welding School. Basic Personal Protection Equipment (PPE) gear includes safety-toed footwear, safety glasses with side shields, a shirt and long pants (non-synthetic fibers only). Items such as helmets, lenses, gloves, leathers and caps may be available in the Lincoln Electric Welding School store at special student prices.

**Equipment and PPE Gear**
Welding will begin on the first day of class. Students are responsible for providing the following PPE gear, which they must wear at all times when welding:

- Ankle-high leather shoes with safety toes
- Safety glasses that include side shields. Prescription eyewear will be allowed as long as it includes side shield protection and meets all other safety requirements.
- Long pants [No synthetic fibers allowed; no cuffs; absolutely no shorts permitted.]
- Long sleeved shirt [No synthetic fibers allowed] or welding jacket
- Welding gloves
- Welding helmet
- Head gear (A bandana or doo rag to protect head from sparks when welding out of position)
- Hearing protection [Earplugs will be provided.]

Students must also be prepared with the following materials:

- Wire brush
- Pliers
- Three-ring binder with writing utensils for class

Safety information, rules, and instructions will be provided to Students periodically. Students must abide by all safety rule and instructions at all times. Failure to do so may result in discipline, suspension, or dismissal.
Any optional equipment worn at the discretion of the student, example: particulate respirator masks, must be provided by the student.

Locks and lockers are furnished by the Lincoln Electric Welding School. Students should furnish any personal items such as a flashlight, channel locks and/or helmet.

Please note: The school is not responsible for articles left in lockers.

Medical Emergency
All medical emergencies must be reported using the appropriate procedures. If you or someone nearby experiences an injury or other medical emergency, immediately contact an instructor or use the nearest telephone to contact Lincoln Electric’s emergency services by dialing 2222. Do not dial external emergency numbers. If you receive an injury that is not life threatening, please notify your instructor.

Other Emergencies
The Lincoln Electric Welding School has an emergency plan in place, which will be explained to you at the start of the program.

Policy Requiring Disclosure of Instructor’s Proprietary Interest
It is the policy of the Lincoln Electric Welding School that any instructor’s proprietary interest in products, devices, services or materials discussed, as well as the source of any compensation related to the presentation are disclosed to learners prior to the start of the learning event.

Intellectual and Legal Property Rights Policy
It is the policy of the Lincoln Electric Welding School to give appropriate credit when a learning event utilizes any media that was not created by Lincoln Electric.
CUSTOMER ASSISTANCE POLICY

The business of The Lincoln Electric Company® is manufacturing and selling high quality welding equipment, consumables, and cutting equipment. Our challenge is to meet the needs of our customers and to exceed their expectations. On occasion, purchasers may ask Lincoln Electric for information or advice about their use of our products. Our employees respond to inquiries to the best of their ability based on information provided to them by the customers and the knowledge they may have concerning the application. Our employees, however, are not in a position to verify the information provided or to evaluate the engineering requirements for the particular weldment. Accordingly, Lincoln Electric does not warrant or guarantee or assume any liability with respect to such information or advice. Moreover, the provision of such information or advice does not create, expand, or alter any warranty on our products. Any express or implied warranty that GMAWt arise from the information or advice, including any implied warranty of merchantability or any warranty of fitness for any customers’ particular purpose is specifically disclaimed.

Lincoln Electric is a responsive manufacturer, but the selection and use of specific products sold by Lincoln Electric is solely within the control of, and remains the sole responsibility of the customer. Many variables beyond the control of Lincoln Electric affect the results obtained in applying these types of fabrication methods and service requirements.
