

# FUME EXTRACTION PREVENTIVE MAINTENANCE

Preventive maintenance and repair is critical to ensuring your fume extraction systems are running efficiently.

## Benefits:

- » Helps equipment achieve a full service life
- » Helps reduce total operating costs
- » Supports a productive and hazard-free work environment
- » Increases system uptime and efficiency

## Preventive Maintenance Service Packages:

### Annual

AD2411-1-12: 1 visit per year

AD2411-1-24: 1 visit per year  
(over 2 years)

AD2411-1-36: 1 visit per year  
(over 3 years)

### Semi-Annual

AD2411-2-12: 2 visits per year

AD2411-2-24: 2 visits per year  
(over 2 years)

AD2411-2-36: 2 visits per year  
(over 3 years)

\*Part number based on per system installation

### Offering:

- » Complete point-by-point check of all system components
- » Certificate of inspection that identifies each item, system or operation that has been checked
- » Ensure all electrical, pneumatic controls, and equipment are operating efficiently

### Preventive Maintenance Service For:

- » Low Vacuum Central Systems
  - Extraction Arms
  - Modular Hoods
  - Downflex® Tables
  - Cutting Tables
- » Circulator® Systems
- » Push-Pull Systems

### Onsite Services Include:

- » Removal of saturated filters, and installation of new filters (if required at time of visit.) Note: customer is responsible for proper disposal of spent filters
- » Verify all electrical (i.e. Variable Frequency Drive, exhaust fan) and pneumatic components (i.e. pressure control, cleaning mechanisms) are functioning properly
- » Tighten and adjust flexible or telescopic extraction arms
- » Adjust Circulator flow nozzles
