ENGINE WARRANTY - CONTACT PROCEDURE

All engines used in Lincoln Electric engine driven equipment are warranted by the respective engine manufacturer for the time period outlined on page PP1.05. A warranty statement, showing the details of coverage, is available from the engine manufacturer. Engine warranty coverage is not the responsibility of the Lincoln Electric Company.

If an engine requires service during the manufacturer's warranty period, please do the following:

A.

Contact the nearest manufacturer-authorized engine repair facility with the following information:

- serial number of engine,
- specification or build list number of the engine,
- hours of use,
- purchase or commission date,
- details of the problem encountered

It is important to establish that engine service will be covered by the engine manufacturer warranty before repair work begins.

B.

If you cannot locate a manufacturer-authorized repair facility in your area or if you are not satisfied with local engine service, contact the engine manufacturer directly with the information itemized in A.

C.

In the unlikely event that you are still unsatisfied after attempting to resolve your service issue with the engine manufacturer, contact the Lincoln Electric Service Department at 1-888-935-3877 or cusserv@lincolnelectric.com with the following information:

- welder (Lincoln) serial number
- your record of service information, as well as prior contact names, dates and phone numbers

A Lincoln Service Representative will contact the engine manufacturer with the information that you provide and request a resolution or an explanation in regards to your engine service issue. If the engine manufacturer is not able to provide a response within a reasonable amount of time, the Lincoln Electric Company will address the situation.
