

SAHARA READYBAG™

Protection Perfect

KEY FEATURES

- Sahara Ready packaging provides superior protection from the elements
- Hermetically sealed foil bag designed to protect against damage and provide puncture resistance
- Nylon reinforced multi-layer foil bulk bag with resealable lid
- Unopened packages maintain low hydrogen flux integrity
- No risk of moisture pick-up, even during the most severe shipping and storage conditions
- No need for pre-baking of flux before use

HERMETICALLY SEALED 50 LB. BAG AVAILABLE FOR:

Lincolnweld® MIL800-H™	ED035892
Lincolnweld® MIL800-HPNi™	ED035893

SAHARA READY BULK BAG WITH DRY-SEAL™ LID

Available for most flux products in 2,200 lb., 2,600 lb. and 3,000 lb. bulk packaging

Moisture Comparison

- Comparative moisture data across various packaging types
- All packaging exposed to 80°F @ 80% relative humidity and then tested after a specific period of days*
