THE WELDING EXPERTS[®]

Lincoln Electric: Total Welding Solutions for Pipeline Contractors

Lincoln Electric is the worldwide leader in providing complete equipment, consumable and application solutions to the welding industry. With more than 9,000 employees, 39 factories and a presence in 160 countries, Lincoln Electric has the resources and expertise necessary to provide reliable solutions to the global marketplace.

Our wide range of equipment, consumables and solutions position us like no other company to enable the Pipeline industry to expand and make the technological advancements necessary to meet global energy requirements.

Equipment Solutions for the Pipeline Industry

High Productivity Solutions

- Increased travel speed & weld quality
- Revolutionary STT®II power source enables more flexibility for high speed, high quality root passes
- Increase production while lowering project costs
- Engine drives with industry-leading arc performance and proven dependability

Consumable Solutions for the Pipeline Industry

From industry tested and approved SMAW electrodes to the latest innovations in high-productivity wire feed capability, Lincoln Electric has a solution to meet your project needs.

- Complete line of consumables for every application specifically designed for pipeline applications
- Consistent performance & robust mechanical properties
- Lot controlled & tested with certified results
- Hermetically sealed, moisture resistant containers
- Global support & training

Lincoln Knows Pipeline Construction

With more than 113 years of experience, Lincoln Electric is the world's largest arc welding company with local offices, manufacturing, training and technical services available throughout the world.

Pipeline construction is a complex process and Lincoln Electric is uniquely suited to help you select the best welding process, procedure, equipment and consumables for your specific requirements. As your welding solutions partner, we will work with you before, during and after solution implementation to offer training, problem solving and consultation.
