May 22, 2013

To: Lincoln Electric Distributors, OEMs and End User Customers

Subject: Conflict Minerals Disclosure

On August 22, 2012 the U.S. Securities and Exchange Commission (“SEC”) adopted Final Rules which implement Section 1502 of the Dodd-Frank Wall Street Reform and Consumer Protection Act. These rules impose certain reporting and disclosure requirements on publicly-traded companies in the U.S. In general, the regulations require that companies

1. Determine whether certain minerals, including tin, tungsten, tantalum and gold (“Conflict Minerals”) are contained in and provide functionality to the products they manufacture and,
2. If so, conduct a reasonable country of origin inquiry to determine whether the Conflict Minerals come from the Democratic Republic of the Congo or one of the surrounding countries of Angola, Burundi, Central African Republic, Rwanda, South Sudan, Tanzania, Uganda or Zambia (“DRC Countries”) or from recycled or scrap sources; and
3. If a company determines or has reason to believe that its Conflict Minerals originated from the DRC Countries and may finance or benefit armed groups, that must be disclosed in filings with the SEC and placed on the company’s website.

Lincoln Electric is aware that many of its customers will need information regarding the Conflict Mineral status of Lincoln products which become a part of the Customers’ product. The purpose of this letter is to explain what Lincoln has done and continues to do to provide the necessary information to its customers.

Consumable Arc Welding Products: Lincoln has preliminarily determined the Conflict Mineral status of its Arc welding consumable products (“Consumables”) by reviewing the specifications and MSDS for each product and its constituent materials. Most Lincoln Electric Consumables do not contain any of the Conflict Minerals. There are a very few consumables which contain Conflict Minerals, for which a country of origin inquiry is being performed. The specific Conflict Mineral status of all current Lincoln Electric Consumables is provided on the attached Consumable Conflict Mineral Status Chart. Updates to this chart will be available on the Lincoln Electric website.

Arc Welding Equipment and Replacement Parts: For customers that do not incorporate the Lincoln Electric Equipment or Replacement Parts into their product, it is not necessary to obtain the Conflict Mineral Status of the Equipment or Replacement Part. Most customers will be in this category. To clarify this point, please refer to the SEC comments published in its Final Rule at Page 90-91 which state:

“... we continue to believe that a conflict mineral in a physical tool or machine used to produce a product does not fall under the “necessary to the production” language in the Conflict Minerals Statutory Provision..... We do not believe that a conflict mineral in a tool or machine is captured by the Conflict Minerals Statutory Provision because,

although the conflict mineral may be included in the tool or machine, it is the tool or machine and not the conflict mineral that is necessary to the production. Additionally, the tool or machine is unlikely to be contained in the final product.”

The Conflict Mineral Status of Lincoln arc welding equipment and replacement parts is also presently being determined. A review is currently underway to identify and conduct country of origin inquiry for conflict minerals in Lincoln Electric equipment and replacement parts. The results of that inquiry will be posted on the Lincoln Electric website as soon as the information is developed from Lincoln’s suppliers.

Hopefully, this letter and the attached chart of Conflict Mineral Status for Lincoln Electric products is responsive to your request. You may obtain updates and view the Lincoln Policy Statement on Conflict Minerals by visiting the Lincoln Electric website for Conflict Minerals at:
<http://www.lincolnelectric.com/en-us/support/Pages/conflict-minerals.aspx>

For additional information regarding the Conflict Minerals regulations, please refer to the SEC website at: <http://www.sec.gov/info/smallbus/secg/conflict-minerals-disclosure-small-entity-compliance-guide.htm> If additional information regarding our products is needed, please visit the Lincoln Conflict Minerals website or contact us by sending an email identifying the specific products for which the further information is needed to: conflictminerals@lincolnelectric.com or contact our Environmental Health & Safety Department at 216-383-2669.

Very Truly Yours,

John Petkovsek
Director, Environmental Health & Safety

Lincoln Electric (US)
